

## PATRICK BAYOU

Deer Park, Harris County, Texas

### SITE STATUS SUMMARY

U.S. Environmental Protection Agency (Region 6)

EPA ID#: TX0000605329

Site ID: 0605329

State Congressional District: 25

Site Status Summary Updated: April 29, 2005

### SITE DESCRIPTION

---

**Location:** The site is located in a mixed urban, highly industrialized petrochemical area in southeast Harris County north of Deer Park, Texas (population 27,652-1990 Census).

**Setting:** Patrick Bayou is one of several small bayous of the Houston Ship Channel (HSC) located within the lower portion of the San Jacinto River Basin. This 3-mile tidal bayou is on the south side of the HSC about 2 miles upstream of its confluence with the San Jacinto River. The Site consists of contaminated sediments within Patrick Bayou, a portion of the East Fork tributary, and associated wetlands. Patrick Bayou is bounded by Occidental Chemical, Shell Refinery, Shell Chemical, and Lubrizol Corporation. The bayou also receives effluent via ditches from the City of Deer Park wastewater treatment plant and an air separation plant, Praxair, Inc.

### PRESENT STATUS AND ISSUES

---

The U.S. Environmental Protection Agency (EPA) sent out Special Notice Letters to the Potentially Responsible Parties (PRPs). The Special Notice Letter provides the PRPs an opportunity to negotiate an Administrative Order on Consent (AOC) with EPA for conducting the Remedial Investigation and Feasibility Study (RI/FS) planned for the Site. The purpose of the RI/FS is to determine the nature and extent of contamination and to gather sufficient information about the Site to support an informed risk management decision regarding which remedy is the most appropriate for the Site. Shell, Lubrizol Corp., and Occidental Chemical Corp. are negotiating with the EPA on the AOC to perform the RI/FS at the site.

### WASTES AND VOLUMES

---

**Principal Pollutants:** Previous investigations confirmed the presence of the following chemicals in Patrick Bayou sediments: chromium, copper, lead, mercury, nickel, selenium, zinc, hexachlorobenzene (HCB), bis-2-ethylhexyl phthalate, polycyclic aromatic hydrocarbons

(PAHs), and polychlorinated biphenyls (PCBs).

**Volume:** The volume of pollutants will be determined during the RI/FS.

## SITE ASSESSMENT AND RANKING

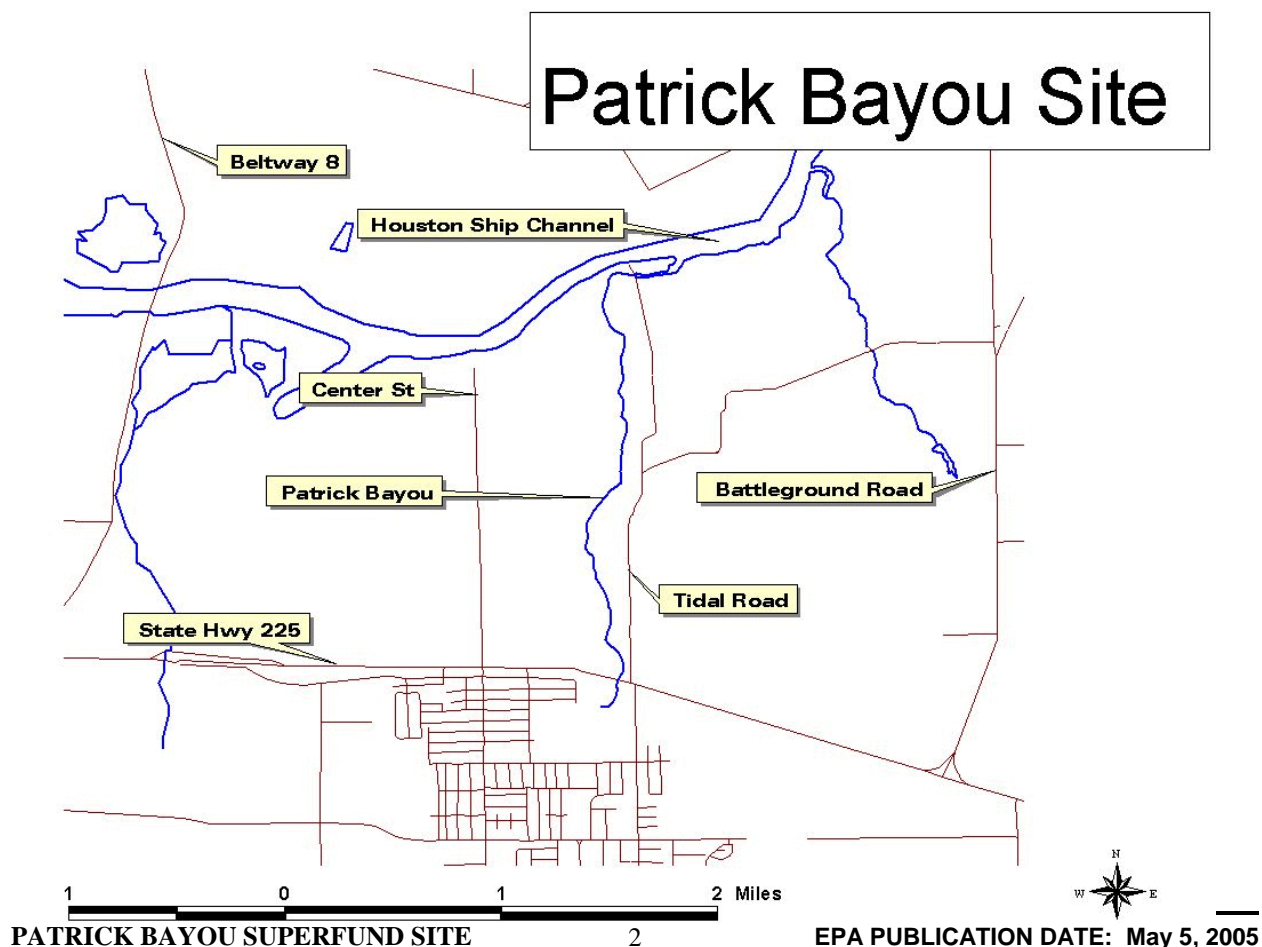

### NPL LISTING HISTORY

**Site HRS Score: 47.83**

Proposed Date: June 14, 2001

Final Date: September 5, 2002

## SITE MAP AND DIAGRAM

## **SITE HISTORY**

---

- 1993-1994: Studies were completed by the City of Houston that investigated wastes accumulating within the Houston Ship Channel and its tributaries from nearby petrochemical plants and accidental shipping spills.
- July 1994: Follow-up investigation jointly sponsored by the Texas Natural Resource Conservation Commission [TNRCC] (now the Texas Commission on Environmental Quality[TCEQ]) Region 12 Office and the EPA Region 6 Office confirmed initial findings and greatly expanded the area of documented contamination.
- March 2000: The TNRCC collected samples as part of a Screening Site Inspection (SSI)
- January 2001: A Hazard Ranking System Documentation Record was published documenting that Patrick Bayou was eligible for listing on the National Priorities List (NPL).
- June 14, 2001: The Patrick Bayou Site was proposed to be listed as a Federal Superfund Site on the NPL by the Environmental Protection Agency (EPA).
- September 5, 2002: The Patrick Bayou Site was added to the NPL as Superfund Site.

## **ENFORCEMENT HISTORY**

---

The EPA issued General Notice Letters (GNLs) to several Potentially Responsible Parties (PRPs) on October 10, 2002. The GNLs notified the PRPs of their potential liability that they may incur or may have incurred with respect to the Site. The GNLs also notified the PRPs of the potential response activities at the Site which they may be asked to perform or finance at a later date.

Special Notice Letters (SNLs) were issued to the PRPs on July 7, 2004. The SNL invited the PRPs to enter into negotiations with EPA for the performance of a Remedial Investigation and Feasibility Study (RI/FS) for the site.

## **HUMAN HEALTH AND ECOLOGICAL RISK ASSESSMENT**

---

A risk assessment will be performed to determine whether site contaminants pose a current or future risk to human health and the environment in the absence of any remedial action. Included in this assessment will be an identification of contaminants of concern, an assessment of exposure to those contaminants through finalization of the site conceptual model, an assessment of the toxicity of those contaminants, and a characterization of risk. This characterization will provide a basis for determining whether remedial action is necessary at the site, describe for which exposure pathways remediation is necessary, and provide justification for performance of remedial actions. Included in this assessment will be characterization of risks to both human and ecological receptors.

## RECORD OF DECISION

---

The final remedy (cleanup alternative) for a site is published in a Record of Decision (ROD). The ROD is the official documentation of how the EPA considered the remedial alternatives and why the EPA selected the final remedy.

A ROD Has Not Been Signed For The Site
--

## COMMUNITY INVOLVEMENT

---

Community Relations Plan: Not yet developed

Open houses and workshops:

Formal Proposed Plan Public Meeting:

Citizens on site mailing list:

Constituency Interest:

Deer Park, TX 77536

## TECHNICAL ASSISTANCE GRANT

---

A Technical Assistance Grant (TAG) provides money for activities that help the community participate in decision making at eligible Superfund sites. An initial grant up to \$50,000 is available for any Superfund site that is on the EPA's National Priorities List (NPL), proposed for listing on the NPL and a response action has begun. More information about the TAG program may be found at <http://www.epa.gov/superfund/tools/tag/faqs.htm>. If you are interested in applying for a TAG, please call Ms. Beverly Negri (TAG Coordinator) at (214) 665-8157 or toll-free at 1-800-533-3508.

## CONTACTS

---

<b>EPA Project Manager:</b>	Gary Baumgarten, <a href="mailto:baumgarten.gary@epa.gov">baumgarten.gary@epa.gov</a>	(214) 665-6749
<b>Site Attorney (EPA):</b>	Anne Foster <a href="mailto:foster.anne@epa.gov">foster.anne@epa.gov</a>	(214) 665-2169
<b>Community Involvement:</b>		
<b>TCEQ Project Manager:</b>	Subhash Pal <a href="mailto:spal@tceq.state.tx.us">spal@tceq.state.tx.us</a>	(512) 239-4513
<b>Regional Public Liaison (EPA):</b>	Arnold Ondarza <a href="mailto:ondarza.arnold@epa.gov">ondarza.arnold@epa.gov</a>	1-800-533-3508 or (303) 312-6777

## **BENEFITS**

---

- The investigation and cleanup of the Site will ensure the protection of human health and the environment. Specific cleanup benefits will be identified during the Remedial Investigation and Feasibility Study currently being planned for the Site.
